The Consumer Price Index (CPI), published by the U.S. Bureau of Labor Statistics, measures the average change over time in the prices paid by urban consumers for a representative basket of goods and services. It serves as a widely accepted indicator of inflation and cost-of-living trends. In this report, CPI may be used as a benchmark to evaluate the real (inflation-adjusted) performance of investments or financial projections. Please note that CPI reflects general economic conditions and may not correspond precisely to the individual inflation experience of any specific client.

Valuation of Private Investments

Values for private funds, limited partnerships, or other non-publicly traded investments are based on the most recent information provided by the fund sponsor, general partner, or manager. These valuations are typically reported on a quarterly or less frequent basis and may be estimates subject to adjustment. No independent verification of these valuations has been performed. Actual values may differ from those shown, and such differences could be material.
